

TOUCHSTONE FLOORING

A Composite Prime Product

Authentic Wood Grain
Waterproof Flooring System

TOUCHSTONE FLOORING

A **Composite Prime** Product

Touchstone Flooring™ is a luxury interior flooring system with a **textured 3D surface** that gives the look and feel of natural wood but without any of the disadvantages of solid or engineered wood floorings.

Suitable for use throughout your home, *Touchstone Flooring™* is **waterproof**, resistant to indentation and colour stable. The boards feature an **acoustic foam underlay** to absorb and suppress household sounds, making it the ideal application for your bathroom, kitchen and living areas*.

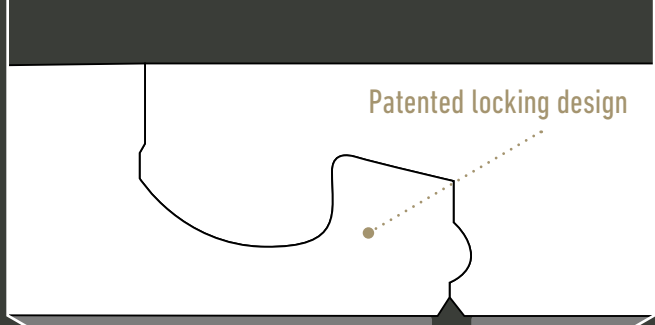

The patented **one piece drop-lock installation** system eliminates the need for specialist tools, allowing an easier and faster installation. Matching trims and skirting are also available to give your project a quality finish.

- **Quick and smooth installation**
- **Compatible with underfloor heating**
- **Domestic and commercial use** (Class 33)
- **Colour fast** (Grade 6)
- **Realistic wood grains**
- **Matching trims**

*Touchstone Flooring is not suitable for installation in rooms that do not have stable ambient temperature such as conservatories or temporary buildings without central heating such as garden rooms and portakabins. Always refer to the fitting guide prior to installation.
