about Composite Prime® _

Established in 2014 in the heart of Yorkshire, Composite Prime® is the fastest growing composite brand in the UK.

Company Directors Domenic Harrison and Charles Taylor's experience in their respective fields has created the perfect partnership for developing Composite Prime's unique products.

The Harrison family has a great history in the plastics industry with Geoff Harrison being a stalwart of the plastic sector who – along with Kevin McDonald – was a founding member of Polypipe Plc in 1980.

The Taylor family has been established in the timber industry for more 60 years with Charles being the 3rd generation timber merchant.

about our materials_

By combining FSC® 100% certified end of life hardwood timber and recycled HDPE plastics, our decking and cladding products retain the natural look and feel of timber with the added strength and durability of plastic. Our formula creates an elegant solution to many of the problems associated with traditional timber, such as rot, colour fade and slippery surfaces.

Our Forest Stewardship Council certification ensures that our end of life timber material is sourced from forests that are managed in a way that preserves biological diversity and benefits the lives of local people.

We perform final quality control procedures on all our products and they are accredited and tested to the latest EN standards.

trusted quality_

HD Deck® Klik is low maintenance and a durable alternative to traditional timber. Our boards are extra hard-wearing and don't need to be coated with life-extending oils and paints. Their unique formula also means that they won't rot or splinter, making them extra safe for children and animals.

Our boards are independently tested and offered with long UK/EU warranties. In 2021 we sold over 2 million linear meters of composite decking boards and received a warranty claim rate of 0.05%.

HD DECK®

***HD Deck® Clik* decking boards have an unrivaled likeness to timber, which really sets them apart from other composites.**

Featuring a solid board construction, *HD Deck® Clik* is compatible with the grad concept rail system, featuring the revolutionary push and click installation method saving time and money.

HD Deck® Clik can also be installed using our Composite Prime® clip system, offering true versatility for the installer and customer alike.

- **Versatile installation options:**
Compatible with the grad® concept rail system
Compatible with Composite Prime® clip system
- **True Grain Colour System™**
- **Solid board construction**
- **25 year UK warranty**
- **Capped design**
- **Slip resistant**
- **Durable**

Can be fit to 300mm and 400mm centres using the standard timbre joist and clip method_

Also compatible with the grad® concept rail systems_

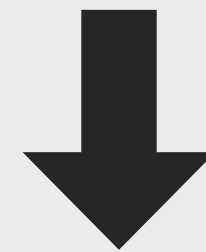

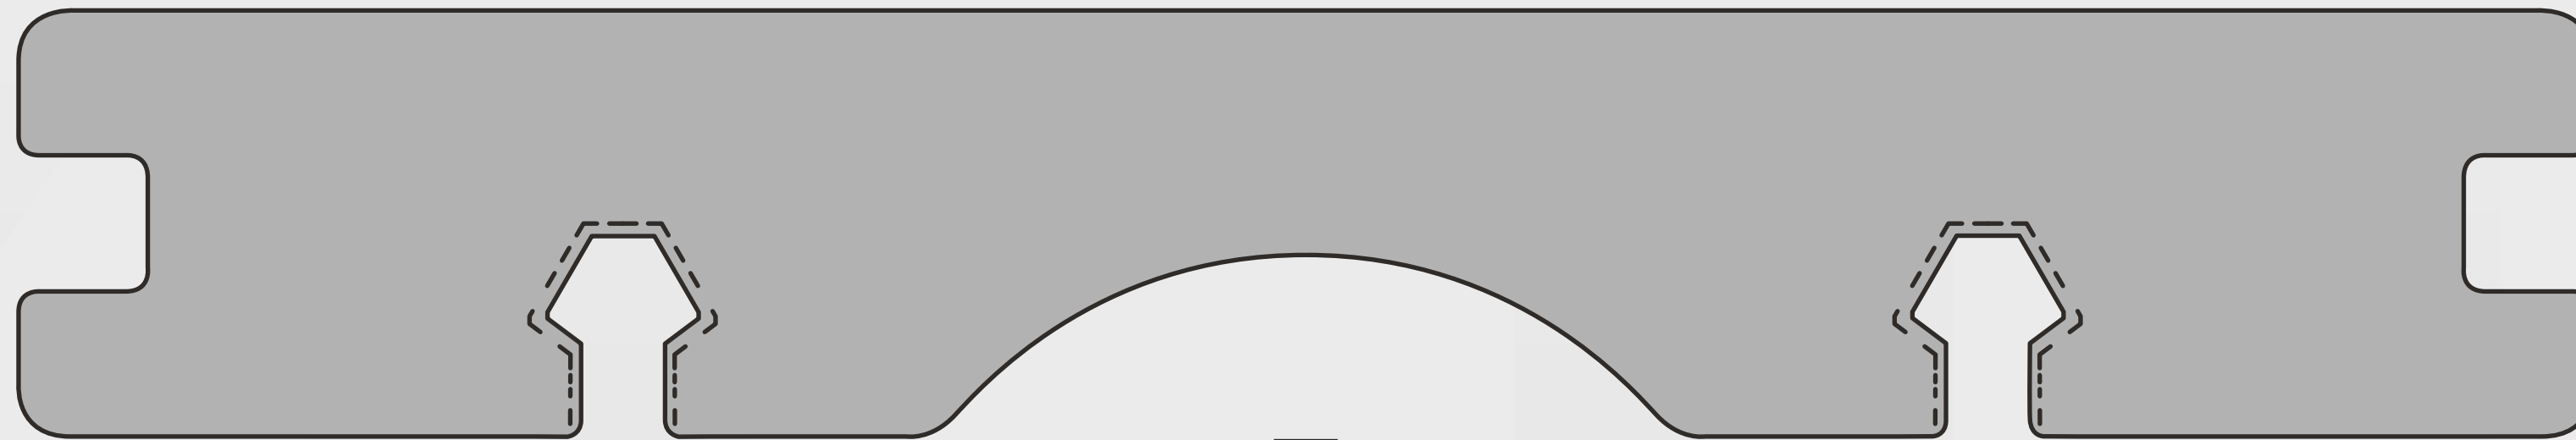

Easy and quick to assemble, it provides considerable comfort and time savings!
Top-of-the-range materials, the leader in clip-on decking.

- Absolutely everything clicks! Rails, studs, distributors, slats...
- Easy to install: a more pleasant posture throughout the construction of your deck
- A lighter system: installation without the help of an additional person
- Time saving: installation time reduced by 50% compared to screwing or screwed clips
- A simple fixing of the blades by pressure (by walking on it!)
- Hands preserved! No drilling or screwing required

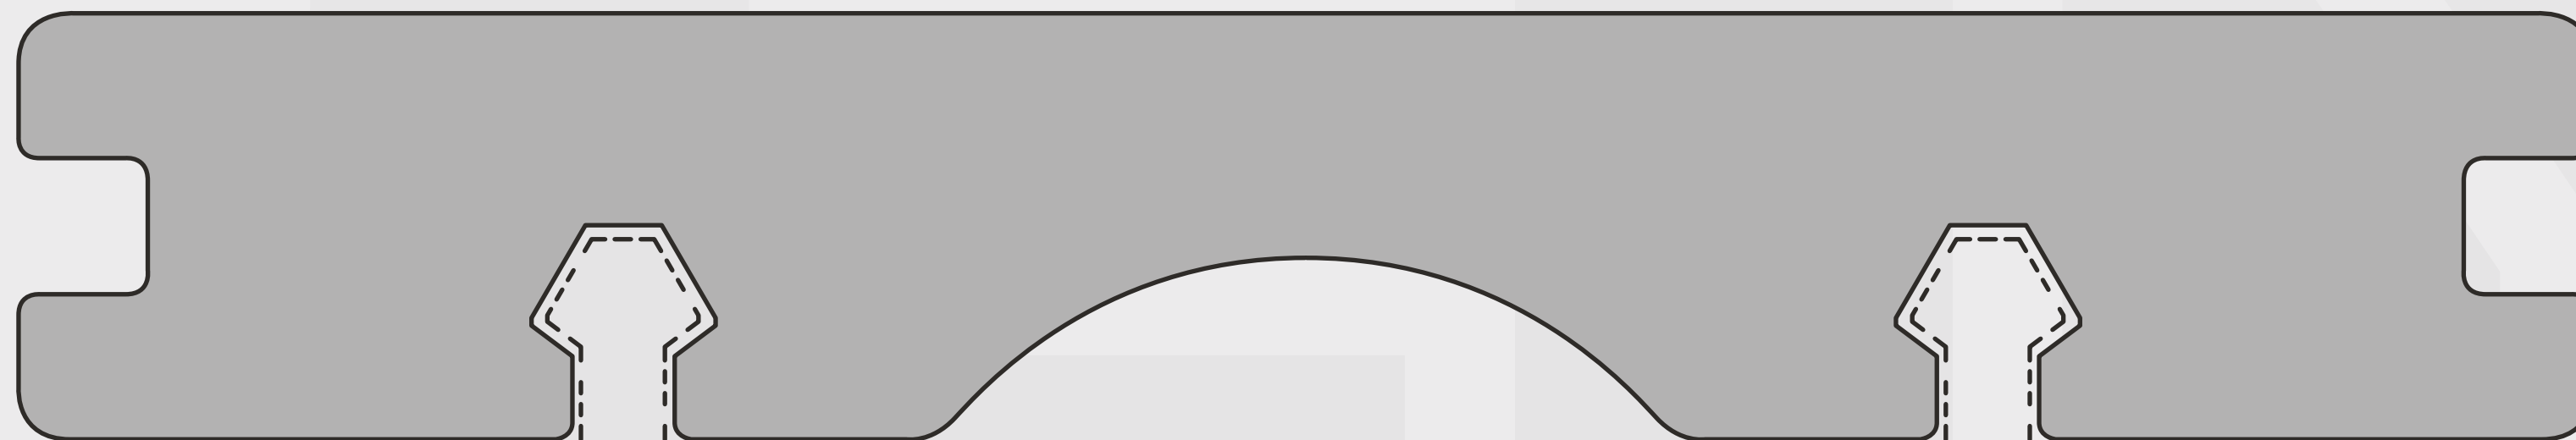

manufacturing process_

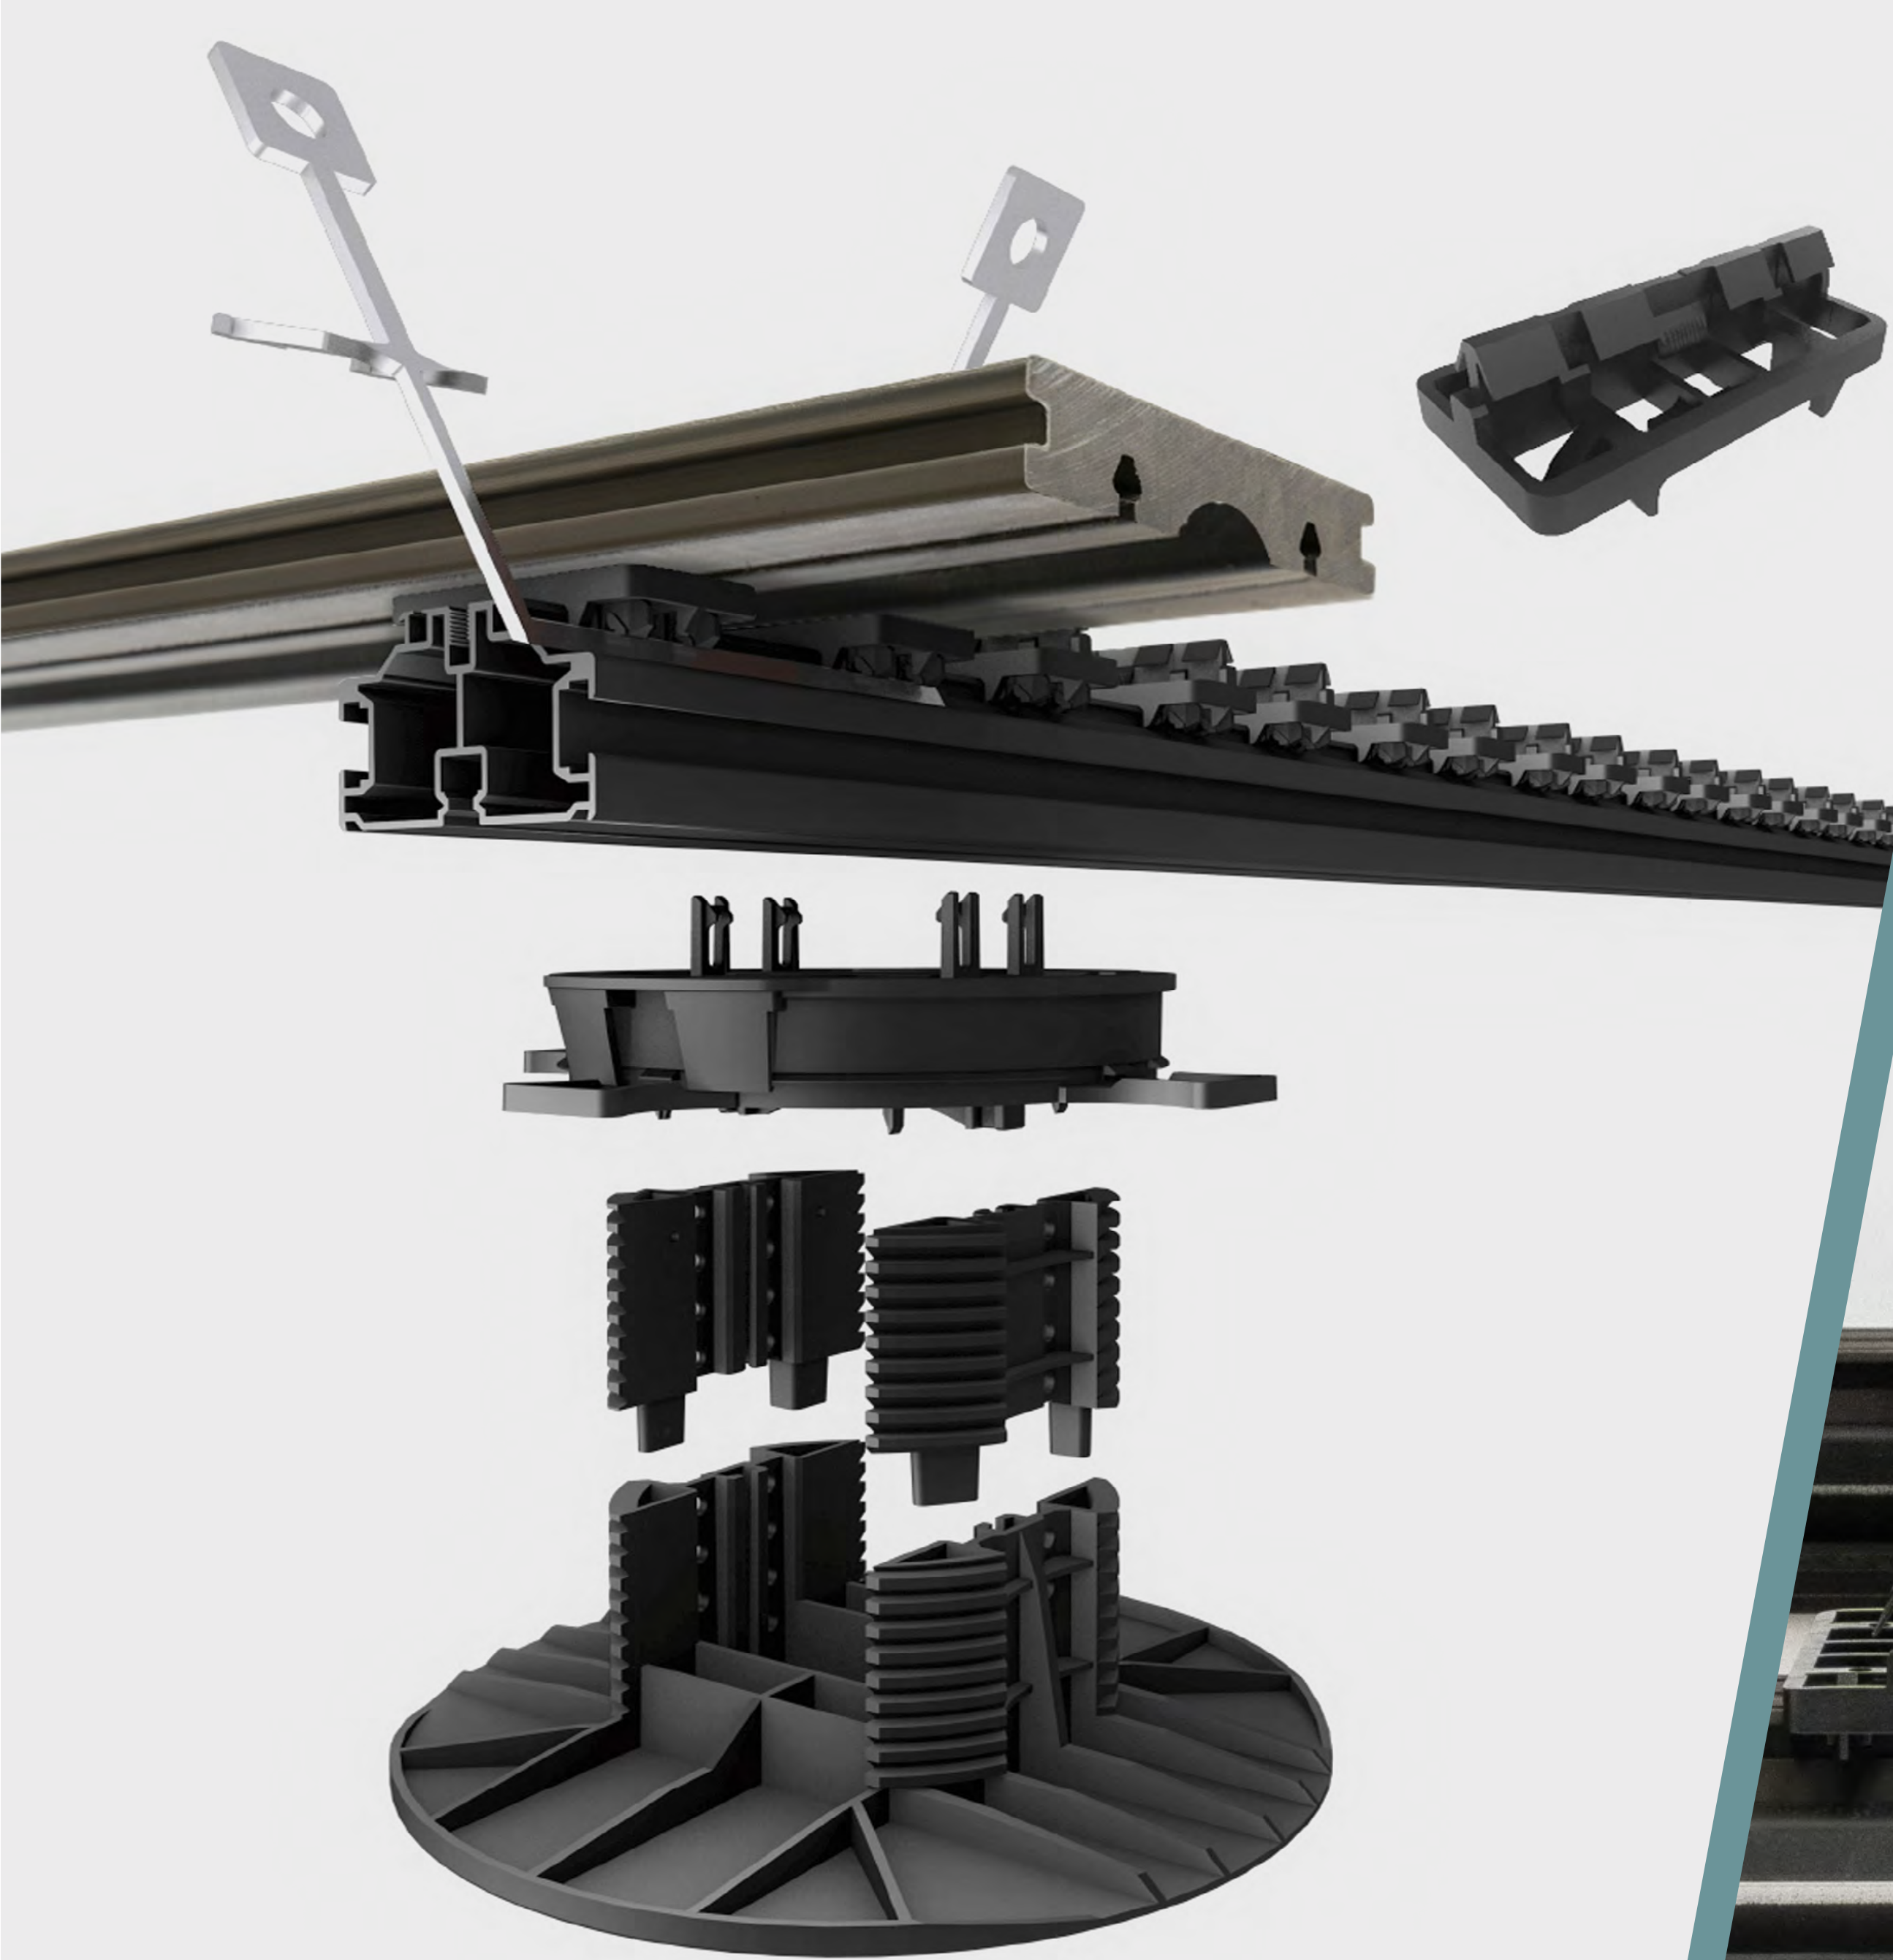

We start the process by testing each batch of raw materials to ensure they meet our stringent quality control parameters. Using the latest technology in our state-of-the-art factory, we blend the components together to create a finished product that's engineered to perform. We test and inspect every production batch to ensure that it meets our specification criteria before we clean and package it. The end result is our guaranteed quality products that are designed to last.
