WEATHERED TEAK

Multi-width boards offer the design flexibility to create a truly unique finish, adding visual depth to any project.

WIDE WIDTH
184 x 25.4 x 4880mm

NARROW WIDTH
89 x 25.4 x 4880mm

STANDARD WIDTH
140 x 25.4 x 4880mm

Curve & shape the boards to contrast the linear limitations that usually prevail with standard decking. Elements® boards are designed for heat bending with the aid of a heating blanket.

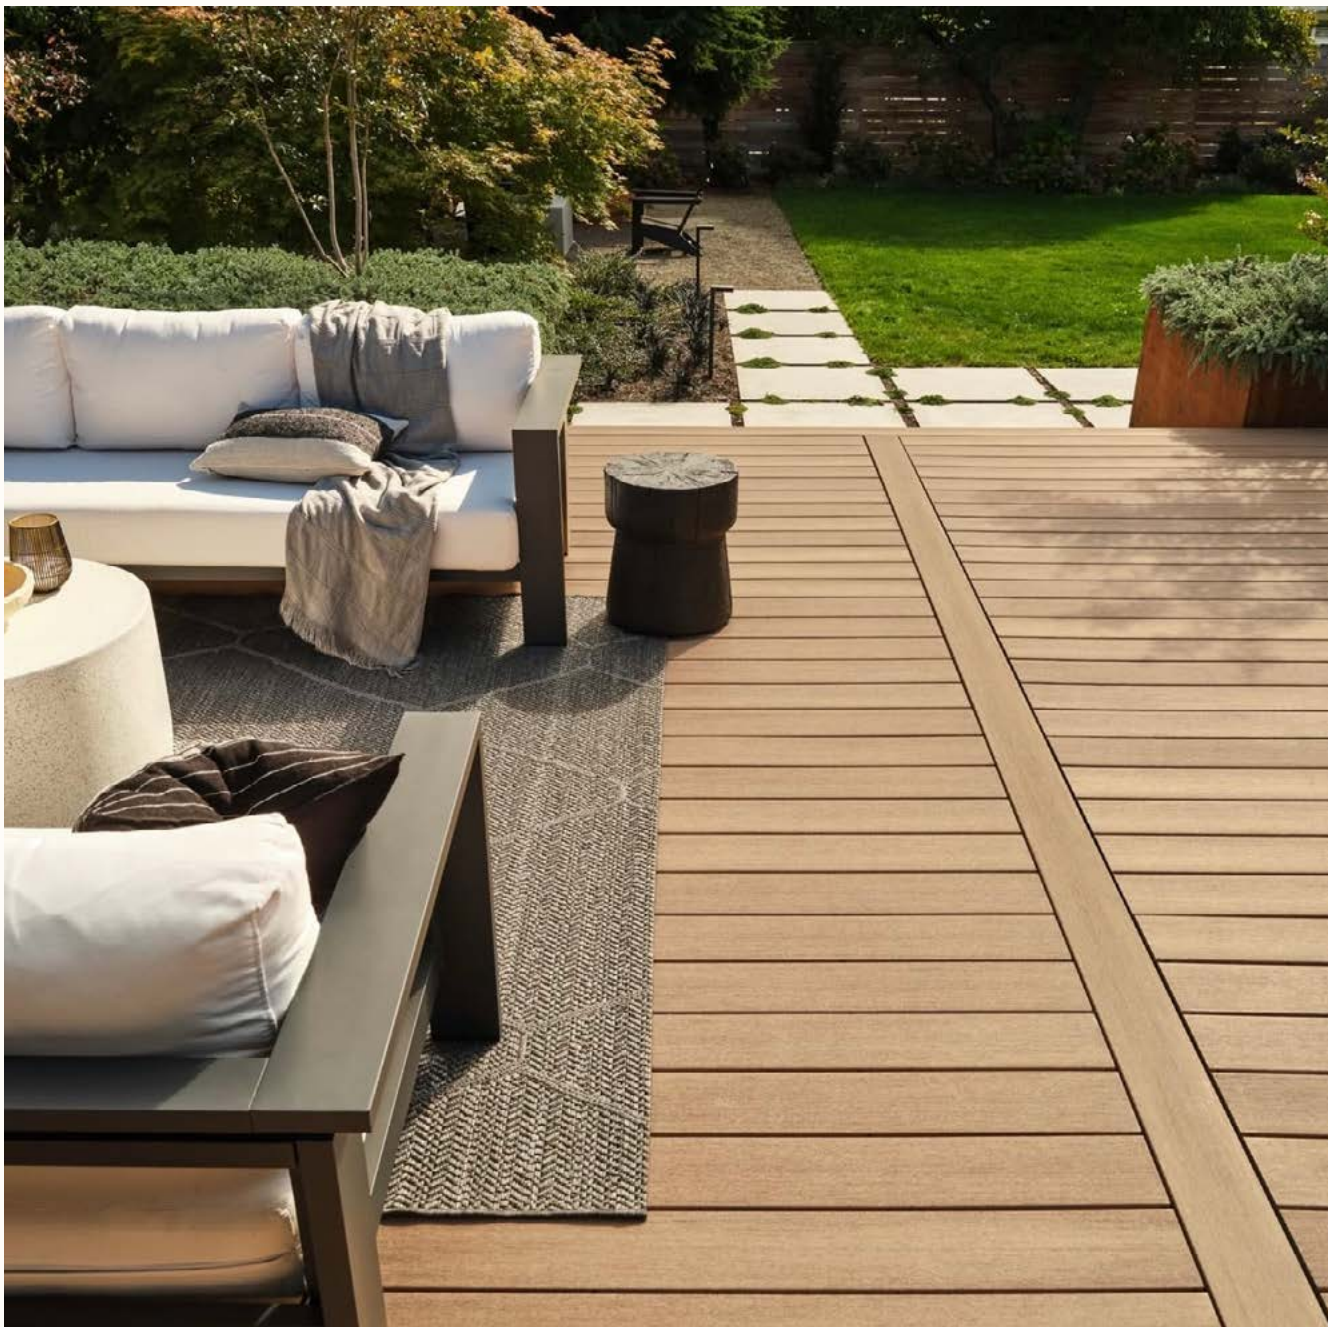

Hidden fixings enabled by the Cortex® Plugs Fastening
System creates a seamless grain flow, further contributing
to the simple installation of an Elements® sanctuary.

From underfoot to upright, Elements® brings architectural continuity to **cladded walls** and **screens** with the same enduring, timber-free sophistication.

Crafted with over **60% recycled content** and **100% recyclable at the end of its life**, Elements® Advanced Polymer Decking offers a consciously designed, environmentally considerate solution, proudly manufactured in the USA.
