

HAMPTON COURT  
GARDEN FESTIVAL 2025

Powered by AZEK

At this year's RHS Hampton Court Garden Festival, Composite Prime worked alongside The APL on their 30th year anniversary garden.

A beautifully designed outdoor space built using our **Elements Advanced Polymer Decking and Redux Enhanced Grain Cladding**. Set against the vibrant backdrop of one of the UK's most iconic garden events, our installation invited visitors to step onto a deck that looked and felt like real hardwood, but with all the benefits of modern, sustainable innovation. The natural tones and textures of the Elements boards blended seamlessly with the surrounding planting, creating a warm and inviting space. This was beautifully paired with our versatile Redux Board and Batten style Cladding, used as a boundary for the garden. It was

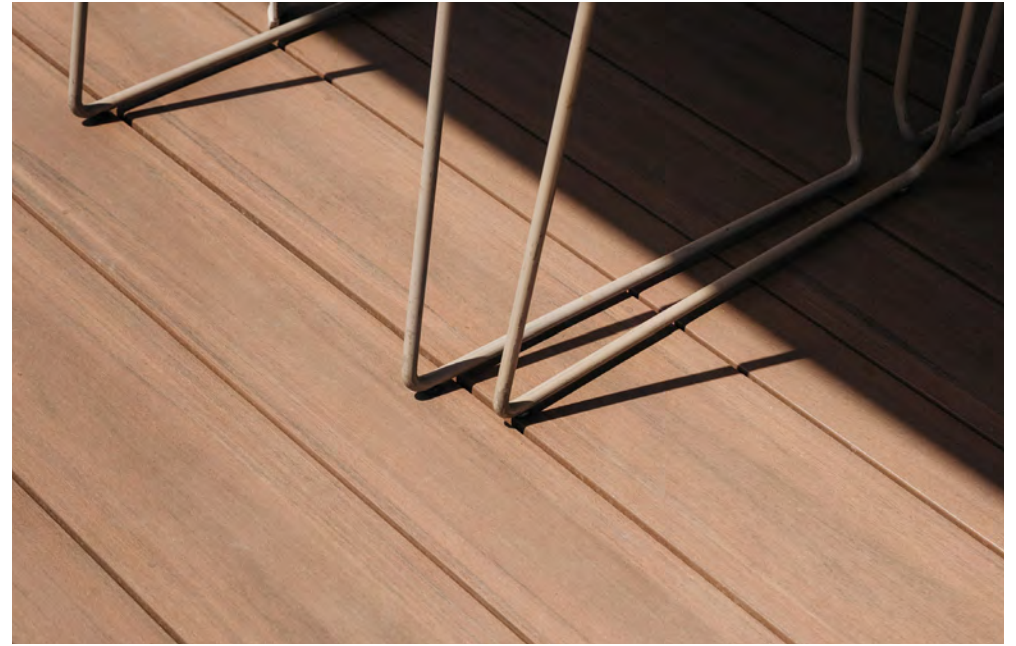

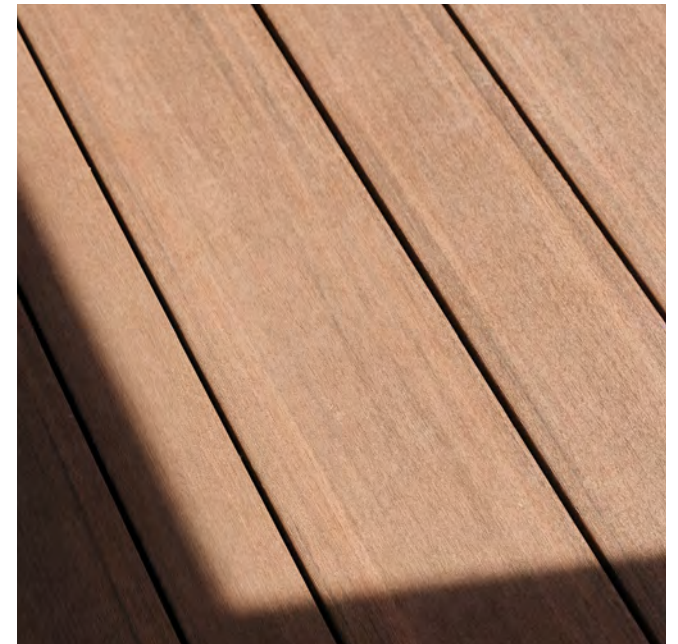

At this year's RHS Hampton Court Garden Festival, Composite Prime worked alongside The APL on their 30th year anniversary garden.

A beautifully designed outdoor space built using our **Elements Advanced Polymer Decking and Redux Enhanced Grain Cladding**. Set against the vibrant backdrop of one of the UK's most iconic garden events, our installation invited visitors to step onto a deck that looked and felt like real hardwood, but with all the benefits of modern, sustainable innovation. The natural tones and textures of the Elements boards blended seamlessly with the surrounding planting, creating a warm and inviting space. This was beautifully paired with our versatile Redux Board and Batten style Cladding, used as a boundary for the garden. It was more than just a display — it was a celebration of how eco-conscious materials can come together to empower stunning designs. For us, it was a proud moment to see our products not just on show, but truly come to life.

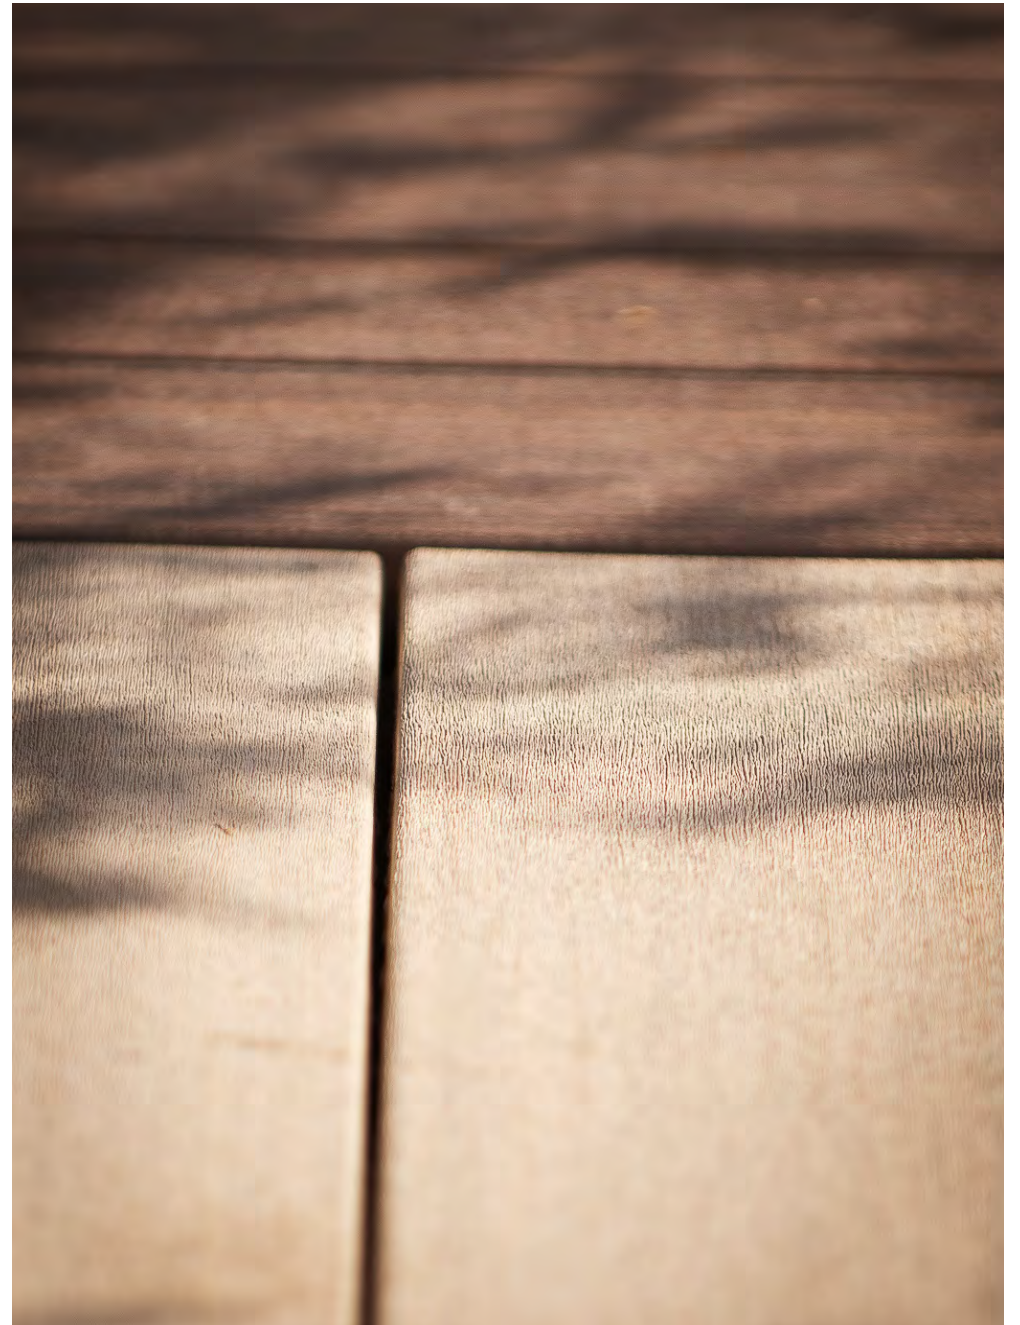

## Hardwood, without timber.

Elements® Advanced PVC Polymer Technology boards delivers an ultra-realistic finish, capturing the complex, multinational aesthetic of premium exotic hardwoods, without the maintenance that comes with traditional timber.

Curve  
& Shape

No Expansion  
Gaps

Fully Recycled  
Material

Cool Touch  
Technology

No Pre-Drill  
Required

### Wide Width

25.4mm x 184mm x 4870mm

### Standard Width

25.4mm x 140mm x 4870mm

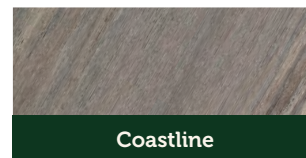

### Narrow Width

25.4mm x 89mm x 4870mm

4.88m  
Length

### Product Colours

Coastline

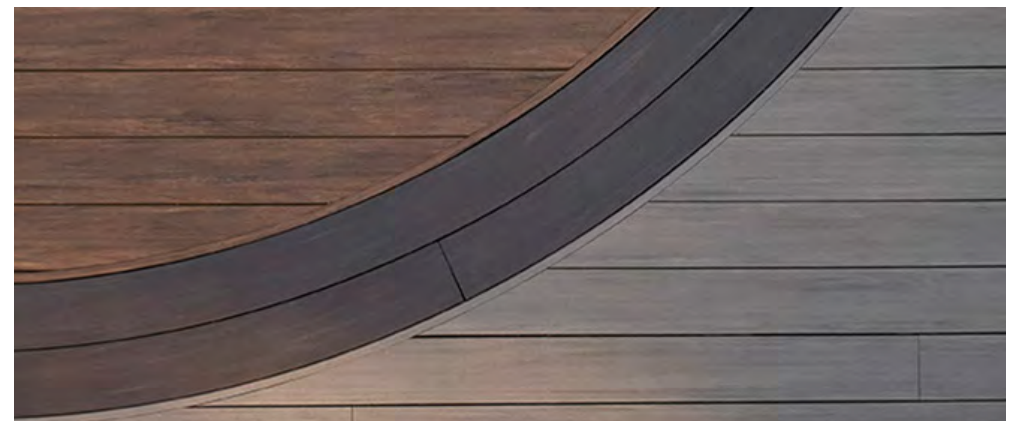

English Walnut

Weathered Teak

**Wondering if composite decking can be curved?** With Elements, it's possible! Our boards are designed for heat bending, allowing you to create unique, eye-catching curves that add a distinctive touch to your deck design. Perfect for adding a creative and unexpected design to your outdoor space.
